PROFESSIONAL SUMMARY

Versatile Full Stack Software Engineer with 4+ years of expertise in Java and .NET Core development, alongside a strong specialization in QA Automation. Expert in Playwright and Selenium testing frameworks. Skilled in designing dynamic applications using Angular/React and architecting modern, scalable backend systems. Passionate about delivering high-quality, bug-free software and highly adaptable to fully remote work environments across global time zones.

TECHNICAL SKILLS

- **Backend:** Java, C#, Python, ASP.NET Core
- **Frontend:** React, Angular
- **QA & Automation:** Playwright, Selenium, TestNG
- **Databases:** MySQL, Oracle, SQL Server
- **DevOps & Tools:** Git, Docker, CI/CD, JIRA

PROFESSIONAL EXPERIENCE

Full Stack Engineer (Backend & QA Automation) *Service Target (Remote - US) | Nov 2023 - Aug 2026*

- Developed highly scalable .NET Core services handling 1000+ concurrent requests.
- Engineered comprehensive automation test suites using Playwright & Selenium, achieving 95%+ test coverage.
- Designed secure RESTful APIs implementing OAuth/JWT authentication standards.
- Optimized database queries, resulting in a 25% improvement in overall application performance.

Junior Software Engineer & QA Automation Specialist *Quadruple Automation Services (Chennai) | Feb 2022 - Oct 2023*

- Developed robust Java and Python automation modules, achieving 95% test coverage using Selenium WebDriver.
- Built responsive and interactive User Interfaces utilizing modern frontend frameworks (Angular, React).
- Streamlined backend operations by optimizing complex SQL queries for better data retrieval efficiency.

QA Automation Engineer *United Techno Solutions | Oct 2021 - Dec 2021*

- Executed rigorous Selenium automation testing on complex JavaScript applications.
- Systematically identified, tracked, and logged software defects using JIRA, ensuring timely resolution.

KEY PROJECTS

- **E-Commerce QA Automation:** Implemented Playwright end-to-end testing, successfully reaching 98% test coverage.
- **Recipe Workflow Application:** Developed a full-stack Java/React application with integrated Selenium testing, driving a 40% improvement in workflow efficiency.
- **Knowledge Hub:** Built backend APIs and Playwright validation tests, resulting in 20% faster issue resolution times.

EDUCATION & CREDENTIALS

B.E. in Computer Science | Syed Ammal College of Engineering (2016) | **CGPA:** 71.2%

- **Certifications:** Playwright Automation (Expert) | Selenium Certification - QSpiders (2019)
- **Languages:** English, Tamil
- **Passport / Visa:** Valid until Oct 2033 | Bahrain License Available
